September 2025: Release notes

Agents

Actions

The Check compatibility action has been updated to support product ID to product ID mapping.

Knowledge

Documents

You can now provide a publicly accessible URL for alby to scrape and extract information from, instead of exclusively uploading a file or uploading via SFTP. New categorization options are also available.

When providing a URL for alby to extract information from, you can set it to automatically refresh the document each week

Products

You can now upload a delta feed of your product catalog to alby, making targeted updates as needed.
