

Connect your Shopify store to alby and let your AI agent help customers shop

Last Modified on 11/07/2025 1:25 pm EST

The Shopify MCP integration helps connect your storefront to alby, allowing your agent to take actions on behalf of the customers. Through the integration, alby can search your product catalog, manage carts and reference policy documents or FAQs on your site.

Using this integration, you can save time on fine-tuning your alby agent and rely more on your Shopify features and catalog.

Enable Shopify actions

To enable the Shopify MCP actions, navigate to  **Agents > Actions**. If you've integrated with Shopify already, a list of actions appears with the Shopify logo next to them.

Enable any that you want your agent to use when helping customers shop for products.

Shopify actions explained

Action	Details
Get Cart Details	Retrieve cart details including items, discount information, and checkout URL for a specific cart ID.
Get Product Details	Look up a product using its ID and specify variant options to find a specific product variant.
Search Shop Catalog	Search for products in your online store.
Search Shop Policies and FAQ	Retrieve information about the store's policies, products, or services, if the storefront is using the Shopify Knowledge Base app .
Update Cart	Perform updates to a cart, including adding, removing, or updating items, buyer information, shipping details, discount codes, gift cards, and notes.
